Precautions and Limitations

Colours shown on this chart are to be used as a guide only. Colours illustrated are reproduced as close as modern printing techniques allow. Brochures and display pavements are intended as an indication only. As the ingredients within this product are derived from natural sources, colours may vary from batch to batch. Variations in colour and shading may also occur, depending on the job conditions, chosen texture and finishing practices employed by your applicator. When flake box opened, colours will appear lighter in the box.

New Generation Blends

(Small size flake only)

These new style colour blends have been targeted at the modern décor of homes. It is especially designed to enhance garage floor surfaces, and appear passive, but look finished in line with the colour décor of the home.

Standard Blends

These flake blends have been the “main stay” of Mastershield for many years and are still popular colour blends in many areas including schools, commercial premises, and some domestic areas as well. These blends come in either large or small size flake.

Marbletone Blends

Specifically designed to look like a Marble effect when applied on surfaces. Richer colours for a highlight effect as well as some passive looks giving customers an option and choice. These blends come in large and small size flake.

Stonegrip Blends

(Certified Slip rated floor to R10/R12)

Specially designed for the areas where slip resistance is required; examples include school toilets and change rooms, exit/ entry areas to commercial premises and commercial kitchens. These blended flakes come with a certificate indicating the “Slip resistant” rating of the surface when totally installed with our products.

COLOUR TINTS

Mastershield M50 colour tints

Innovative Designs

Mastershield Polymer Flooring can be applied to most floors that have a firm surface. Suitable for internal areas such as garage floors, home bars, entertainment areas, laundry and rumpus rooms.

Note : Mastershield colour tint when applied to Mastershield M50 opaque base, provide paler muted colours. Colours represented are indicative only.

Colour tints

Mastershield M50 can be used as a chemically resistant protective coating for your garage floor. The base colours can be used as a stand alone look or you can add a partial flake to create a terrazzo look.

The Mastershield Polymer Flooring is a seamless decorative interior surface range for domestic and commercial applications. Available in a wide variety of colours and striking finishes, Mastershield can be customised to suit your décor.

Mastershield flooring systems are ideal for restoring uneven, cracked and eroding concrete floors. It is extremely hard wearing, hygienic, easy to clean with design flexibility.

Mastershield M90 colour tints

Note: colours represented and indicative only.

The Protection Factor

Mastershield is inherently a hard wearing flooring compound. The dense M90 polymer structure provides exceptionally high resistance to wearing.

Mastershield polymer flooring provides a protective layer from the absorption of water and oil spills. The smooth and seamless surface also makes it extremely easy to clean and maintain. For the chemical resistant levels please refer to the Technical Data Sheets for more information.

Colour Effects

Mastershield offers the versatility to create completely customised floors.

Unlimited fleck designs, unlimited flake combinations, full flake or partial flake, a scatter of glitter or lots of glitter, the selection is unlimited and the choice is yours.
